Casting Price Assessment

1. Basic Materials

Carbon steel. Alloy steel. Spring steel. Bearing steel. Tooling steel. Stainless steel. Heat resistant steel.

2. Casting Base Price

No.	Materials Category	Base Price (\$)	Manufacturing process
1	carbon steel	4.5USD per KG	Silica sol process
2	alloy steel	4.8USD per KG	Silica sol process
3	spring steel	5.1USD per KG	Silica sol process
4	bearing steel	7.3USD per KG	Silica sol process
5	tool steel	9.1USD per KG	Silica sol process
6	stainless steel	10.5USD per KG	Silica sol process
7	heat resistant steel	12.3USD per KG	Silica sol process

3. Finished product prices estimation

3.1 According to the base price of the determined casting, and the analysis of affecting factors of the costs, adjust the base price, finally, get the estimated price of castings.

3.2 According to those six different circumstances: Complexity k1、Accuracy k2、Blank Weight k3、Production volume k4、Processing requirements k5、Casting Yield k6, divide level of the casting, and determine factors that affect the price of the casting.

Finished Product Price Formula: $G = S \times k_1 \times k_2 \times k_3 \times k_4 \times k_5 \times k_6$

$$S = [(C+M)(1.00+L)]/(1-R)$$

G—Price of casting; S—Casting benchmark price; k1 ~ k6—factors of casting floating price; C—Manufacturing cost; M—Operating costs; L—Casting margins (%) ; R—Sales tax (%) 。

Notes:

* ASTM A27 Class 1 requiring post-weld heat treatment on all welds is standard from AMERICAN CENTRIFUGAL. Class 2, which does not require post-weld heat treatment of welds, is not available.

** Impacts (Ft.-Lbs.) to be mutually agreed upon.

+See specification for maximum Brinell hardness after final heat treatment.

The latest revision of a specification shall take precedence in which case the chemical composition may vary from that shown above.

See the Annual Book of ASTM Standards, Section 1, Volume 01.01 and 01.02 for complete details of the specifications.

AMERICAN also produces material to other ASTM specifications such as A356.
